RSJ Inspection® is excited to announce its new initiative - [Associate Quality Professional Program](#) (AQP), which is developed to realize our company's purpose "Responsible Value Creation". Adding to that, we intend to share our knowledge & experience with the Students Community with the aim of helping and creating value for them.

Nowadays, a lot of College Students in who wish to pursue their career in Textiles/ Apparels are facing difficulties to meet the industry expectations and needs. Associate Quality Professional Program helps to fill the gaps of Industry expectations and upgrade the skillset for students to be future ready.

This Associate Quality Professional Program is a **CSR initiative** taken by RSJ to help students, and others like mentors, Institutions and for our organisation as well, to access and learn about latest developments with respect to Quality, Conformity Assessments, Factory Audits and Quality Standards etc. This program has three levels, Level 1 is about general awareness, Level 2 is about Auditing & Auditor competencies and Level 3 is In-plant training. For this program, we have approached around 8 Academic Institutions all over India and conducted orientation sessions in order to give a clear understanding about the program to both Academic Institutions and students. Interested students will be asked to register for the levels that they wish to pursue.

Alison is a MOOC platform, which provides free online education and mostly focuses on workplace-based skills. In this Program, Students are exposed to the Alison course contents that are shortlisted by our industry experts. Those shortlisted courses are shared with the students at a regular time interval. Students are asked to create a video, delivering about their understanding from each course. They also get an opportunity to share their learnings & experience in the forum where industry experts, mentors, and students of different locality will be present. This enables them to come out of their comfort zone and creates wonders in their career path. After completion of AQP Level 1, we have conducted a survey to gather perceptions of the participating Students, Academic Institutions, and Mentors for future enhancements.

In the level 2 program students are given training on the standards and fundamentals of the audit. Delighted to share that two of our students from AQP Batch 1 (after completing their level 2 course) under mentorship of our ED, got an opportunity to impart awareness to one of the clients who approached us by getting inspired from one of our LinkedIn posts which were shared on behalf of our knowledge-sharing platform [Qualpedia™](#). The awareness was created on various topics like Audit Fundamentals, Auditor competency, and Audit Report Review. This opportunity increased their level of confidence and also enhanced their content deliverable skills.

In the Level 3 program students can learn about various technical standards along with the real-time experience of conducting the Inspections with the guidance of senior associates. Students who complete all the courses according to the criteria set by RSJ will be provided with a course completion certificate after each level.

This initiative is also intended to help the Mentors by enhancing their mentoring, Leadership & Interpersonal skills, Opportunity to share knowledge and experience, refresh and gain knowledge, contribution to a larger National Cause. Institutions get an opportunity to guide students into the field of quality. Internship, more placements possibilities, guest lecture, organising conferences, training programs, collaborative projects, syllabus design, exposure to Industry best practices, brand building opportunities. Students become proficient in latest quality management practices, knowledge enhancement and career opportunities. Benefits for RSJ include engaging and motivating employees, creation of human capital, more networking opportunities with academia.

Academic Institutions like Bannari Amman Institute of Technology, Tamil Nadu have come forward and signed an MOU with us. Currently, the Level 1 program is completed for both batch 1 & 2. Glad to share that **70%** the students of AQP Batch 1 who completed level 1 successfully were successful in getting placement in various organisations including RSJ.

RSJ would like to thank all the Institutions, Students and Mentors for their active participation and support throughout this program and for making it a success. Also, we are grateful to all the Academic Institutions for believing and enrolling in this "Giving Back to Society" initiative and supporting us to create value for the ecosystem.
